

Own brands

range

Excellent value for money

Alexandra Takacs
Marketing & Administration Manager

Welcome!

Dear HENRY SCHEIN customer, dear HENRY SCHEIN customer,

I am pleased to present you our new Henry Schein private label catalog 2023/2024 to introduce. Discover our extensive own-brand range on over 65 product pages, which we continually add new products for you.

You can recognize our own brand Henry Schein by its quality seal. This stands for a large selection, best quality and consistently low prices.

This time we paid particular attention to our expanded disinfection range, with our new EuroSept Xtra product line. In times when hygiene and cleanliness are top priority, we have carefully expanded our range of disinfectants, cleaning products and protective items to make your work environment as safe as possible so that you can concentrate on what is important: providing the best possible care for your patients.

Browse through our new catalog and be inspired by the diverse products. Thank you for your trust in Henry Schein.

Sincerely, yours

Alexandra Takacs
Marketing & Administration Manager

NEW

EuroSept Xtra Washing Lotion Washing lotion, pH

skin-neutral, for stressed skin and hands.

The pleasantly fine-pored, creamy foam cleanses gently and thoroughly. The lanolin it contains as well as another moisturizing agent and the skin-friendly cleansing surfactants prevent the skin from drying out during washing. The washing lotion is free of dyes and has a pleasantly subtle scent.

NEW

NEW

EuroSept Xtra Washing Lotion Sensitive

Creamy, delicate, pH skin-neutral washing lotion for regular cleaning of skin and hands. Moisturizing ingredients and glycerin prevent the skin from drying out during washing.

Cleans thoroughly and is economical to use. In addition, the mild washing lotion is free of perfumes and dyes and is therefore suitable for use on healthy skin in order to prevent the development of allergies due to the substances mentioned.

EuroSept Xtra Bio rapid disinfection wipes

Made from 100% biodegradable vegetable fibers. Aldehyde-free, phenol-free. Pack of 80 pieces

Piece	988 9964	10.90
from 3 packs each		9.90

Instructions for use

Ready-to-use surface disinfectant wipes. Open the safety film under the cap and remove the first wipe from the pack. Use the removed cloth as quickly as possible and do not use it a second time. Completely wet the surfaces with the pre-soaked wipes and spread the disinfectant solution. Keep the surface moist throughout the entire exposure time. In food areas, surfaces must be treated with water of drinking quality. After disinfection, wipe the surfaces with a hygienically clean cloth if necessary. Intended for professional use only.

Keep the package lid and safety film tightly closed.

Highly effective wipes for alcohol-sensitive surfaces.

EuroSept® Xtra wipes for alcohol-free surface disinfection

Advantages

- > Suitable for use on alcohol-sensitive surfaces
- > Broad spectrum of action against Bacteria, yeast and viruses

Noroviruses according to EN 14476 (low burden)	Conc. 30 min.
Polyoma SV 40 viruses (RKI/DVV) (impurity)	Conc. 30 min.

Ingredients: 100 g contains: 0.24 g benzyl-C12-16-alkyldimethylammonium chloride, 0.24 g N,N-didecyl-N, N-dimethylammonium chloride, 0.24 g C12-14 alkyl[(ethylphenyl)methyl]dimethylammonium chloride

*Do not wipe dry before the end of the application time.

EuroSept Xtra
cloth dispenser (empty)

Tightly closing dispenser bucket system for hygienic filling of fleece wipes and disinfectants/cleaners or before soaked wipes. The wipes can be removed quickly and conveniently from the practical, reusable bucket.

- > Lid diameter: 22.5cm, base diameter: 19.5cm
- > Height including lid: 23cm, height without lid: 21.5cm

Piece	979 6544	9.50
from 3 pieces each		8.50

EuroSept Xtra
cleaning cloths (non-woven, dry)

Dry fleece cloths for soaking with VAH/DGHM-listed disinfectants. Application: Place the fleece cloth roll in the dispenser bucket and slowly pour 1.4 liters of ready-to-use disinfectant solution over it. Let the soaked roll stand for about 30 minutes until all cloths are completely evenly moistened. Then write the label with the relevant information. The soaked cloths may be used for a maximum of 28 days! Recommendation according to EN 16615: HS EuroSept Xtra surface disinfection; The exposure times of the respective soaking liquid compatible with the corresponding cloth (according to EN 16615) must be observed.

EuroSept Xtra instrument disinfection concentrate

Liquid concentrate for the manual disinfectant cleaning of medical instruments using the immersion bath process. Spectrum of action: bactericidal, yeasticidal, limited virucidal. Also suitable for use in an ultrasonic bath at room temperature. Very good material compatibility, extremely gentle to use (aldehyde and phenol free). Does not fix proteins (blood) and has very good cleaning performance. Not suitable for final disinfection of semi-critical and critical medical devices.

Size	Order no.	Price
2 liter bottle	988 4863	26.50
5 liter canister	988 4864	51.90
from 3 canisters each		49.90

NEW

EuroSept Xtra Enzyme cleaner for instruments

Offers good material compatibility and is therefore the ideal cleaning concentrate for the manual reprocessing of surgical instruments. Does not foam and is suitable for use in an ultrasonic bath. The enzyme cleaner offers excellent cleaning performance by combining non-ionic surfactants with a stabilized complex of three enzymes. The self-acting formula effectively penetrates and removes all types of organic contaminants such as clotted blood and mucus, even in hard-to-reach areas. Suitable for ultrasonic bath. Instrument cleaning: 1% (10 ml/L). Cleaning in an ultrasonic bath: 0.5% (5 ml/L). Temperature: Prepare solution with warm water (30 - 40 °C). Exposure time: at least 5 minutes. Complies with EU Directive 93/42/EEC for medical devices. Neutral smell.

NEW

EuroSept Plus Orange Oil Cleaner

Special cleaning solution for practices and laboratories with natural orange oil to remove zinc oxide cement, alginate and plaster residues as well as impression pastes, blood residues and other contaminants.

The Orange Oil Cleaner cleans impression trays, instruments, glass plates and ceramics. It is therefore ideal for use on stainless steel and other surfaces. Please check for compatibility in an inconspicuous area beforehand. Pleasant orange scent, high concentration of orange oil. Attention: very high cleaning effect!

Compared to the HS-Orange Solvent, the HS-Orange Oil-Cleaner is made from pure, high-quality orange oil and therefore has a higher cleaning effect. Not suitable for painted surfaces. Do not use on plastic surfaces.

250ml bottle	988 2716	8.90
from 5 bottles each		7.90

EuroSept Plus Foam cleaner

Ready-to-use cleaning spray for quick and intensive cleaning of plastic surfaces, artificial leather surfaces, devices and objects.

- > Very compatible with materials, even with sensitive ones
Surfaces such as artificial leather or plexiglass
- > Excellent cleaning performance
- > Ready to use, without dyes

The ready-to-use solution is applied undiluted to objects and surfaces from a distance of approx. 20-30 cm as foam (use a suitable foam spray head) and distributed evenly with a lint-free, undyed disposable cloth and allowed to take effect briefly. Make sure it is completely wetted.

Before large-area applications on sensitive materials such as artificial leather, test for material compatibility in a small, hidden area. To avoid the formation of streaks, the treated surfaces should be wiped at regular intervals with a disposable cloth moistened with water. VO 648/2004/EC: Contains < 5% cationic surfactants, perfume. Spray bottle (1 liter)

1 liter bottle with spray head	988 3996	11.90

See cleaning agents from
page 30**1 ultrasonic cleaning device Sweep 2000**

The Sweep 2000 ultrasonic cleaning device is an innovative device with the latest technology. Particularly noteworthy are the automatically locking lid, the larger drain, the unique and newly designed hanging basket which allows for hand-free draining, and the digital control panel. The new housing makes cleaning quick and easy. The device is ideal for the cleaning process in medical practices, as it standardizes the cleaning cycle thanks to the new hinged and snap-in lid. The new lid also ensures a closed cleaning cycle and very low operating noise.

Technical data:

Power: 43Hz 95 watts; Capacity: 4 liters; Timer: 60 minutes; Heating: 55 watts; Dimensions: 37.5 x 26.7 x 26.7 cm; Tank dimensions: 28.6 x 14 x 8.9 cm; Weight: 6.8kg

Scope of delivery:

1x cleaning unit + lid; 1x drain + hose; 1x power cable; 1x instruction manual

Wash test indicator strips

The HS-Wash Test indicator strips are used to check and monitor the cleaning efficiency of cleaning processes in surgical cleaning and disinfection devices for surgical instruments. The test provides a visual indication of problems with chemical and/or mechanical cleaning operations during the cleaning/disinfection program. The test checks blood residue on surfaces. Routine use of the HS-Wash test ensures that the RDG/Thermal Infector is operating at a consistent level every day. The HS-Wash test is easy to use, shows clear visual determination, is easy to record, lead-free and non-toxic and complies with EN ISO 15883-1/ : EN ISO 15883-5.

Protecting the planet for a healthier future

Paper cups, biodegradable

Cup made of PLA paper, biodegradable. The cups offer an environmentally friendly alternative to conventional paper cups. These cups were specially marked with the "green" leaf as a reminder that the cups can be composted. The paper cups made from renewable materials are made of cardboard that is considered suitable for commercial composting according to the EN13432 DIN-Certco standard. Advantages: Made from renewable raw materials! Compostable!

HS paper cups recyclable

Mouthwash cups meet EU wood protection regulations. Technical: RIM ROLL Ultra-tight roll designed for superior quality: such as sidewall rigidity to ensure a secure grip. Internal coating: made with food grade PE (polyethylene). Side wall: made with *PEFC-certified, sustainably sourced cardboard. *PEFC is the largest institution for ensuring and marketing sustainable forest management through an independent certification system. Wood and wood products with the PEFC seal demonstrably come from ecologically, economically and socially sustainable forestry.

Note: We recommend not using the cups with sodium hypochlorite or CHX for a longer period of time.

EQUIPMENT TESTS AS SCHEDULED —
WE WILL HELP YOU!

The use and use of medical devices in Austria is regulated by the Medical Devices Act (MPG) and the Medical Device Operator Ordinance (MPBV). A distinction is made between:

Metrological

Controls (MTK)

Metrological controls are for all devices with measuring function, which are listed in Appendix 2 of the MPBV, mandatory:

- > 1 year review period for medical devices acoustic determination of hearing ability (e.g. audiometer, infrared radiation thermometer)
- > Inspection period 2 years for electric thermometers, Medical devices with replaceable temperature sensors, medical devices for non-invasive Blood pressure measurement, medical devices for determining intraocular pressure (e.g. blood pressure monitor, eye tonometer)
- > Verification period according to the Measurement and Calibration Act medical scales

Safety-related

Controls (STK)

Safety controls are for operators

Periodic safety checks required for medical devices that must be carried out.

According to the Medical Device Operator Ordinance (MPBV), the following devices must undergo STK:

- > All active medical devices, all those products that are operated with energy (electricity, compressed air, etc.), including defibrillators, stimulation current devices, ECG devices, sterilizers, ultrasound devices, electro-surgical devices and much more
- > All non-active medical devices where the Manufacturer specifies an STK

Interval: If the manufacturer specifies an interval, this must be adhered to. If the manufacturer does not explicitly specify a STK or an interval, the intervals according to the MPBV must be adhered to. The test intervals are between 1 and a maximum of 3 years.

REPAIRS AND MAINTENANCE

Qualified device management and reliable service are indispensable foundations on which you can rely you need to rely on when testing and maintaining your medical devices. For all questions about maintenance and repairs, simply contact our technical service - we will take care of it.
